

colliding spheres – a curved space

VALLONE® presents sculptural mirror

Mirror and lamp as one: The frameless mirror surface of COLLIDING SPHERES gracefully curves around the opal glass sphere light. The mirror's sculptural character elevates it from a simple reflective surface to an artistic wall object, allowing for extraordinary setups.

AN INSEPARABLE FUSION OF LIGHT AND FORM

A dynamic design inspired by the force of two colliding spheres: The mirror surface and the sphere light form a bold and inseparable unit. The mirror combines organic shapes with a minimalist aesthetic while still making a striking design statement. COLLIDING SPHERES by VALLONE® is available in three sizes, offering versatile design possibilities that seamlessly integrate into a variety of interior concepts. The 15 cm sphere light, crafted from silk-matte opal glass, creates atmospheric lighting while providing direct illumination from the front. The matte surface diffuses the light, resulting in a soft and pleasant ambiance. Depending on the setting and room concept, the mirror can be placed flexibly in a 100 cm or 80 cm diameter, or in a 60 x 100 cm version. With COLLIDING SPHERES, VALLONE® once again demonstrates its dedication to exceptional and innovative design combined with the highest standards of quality.

VALLONE® stands for exceptional design, uncompromising quality and a clear vision: to create spaces that are both functionally and aesthetically outstanding. With a portfolio characterized by timeless elegance and modern lines, VALLONE® has established itself as a style-defining interior brand on the international design scene.
