

aerra haze – reflecting the essence

RED DOT honours the washbasin ensemble AERRA HAZE with “Best of the Best”.

AERRA HAZE by VALLONE® ATELIER brings together material contrasts and architectural clarity. The sculptural ensemble acts as a design metaphor, embodying perception and awareness – a diffusion that transitions into clear reflection. A reduced composition, awarded the Red Dot Design Award 2026 “Best of the Best”.

Natural stone and stainless steel come together to form a calm, vertically oriented object. The design is “so self-evident at first glance – and derives a particular strength precisely from this quality. [...] This quiet reduction is compelling while at the same time possessing an exceptional presence,” as stated by the Red Dot jury.

PRECISION BETWEEN MATERIALITY AND REFLECTION

At the core of the design is the combination of a horizontal washbasin crafted from Tundra Grey marble and a vertical stainless steel mirror surface. The thin metal sheet undergoes a manual finishing process, transitioning from a matte brushed texture to a high-gloss polish. This creates a subtle gradient from diffuse to clear reflection. The controlled shift in mirror quality connects function and aesthetics in a way that is perceived almost subconsciously at first glance.

The interplay of brushed stainless steel and cubic Tundra Grey marble results in a design object that moves between visual and tactile perception. The material surfaces emphasize the ensemble's refined yet raw and reduced character. The cubic AERRA washbasin enters into a dialogue with the cool precision of stainless steel. Tundra Grey marble is defined by its warm grey tone, vibrant structure and subtle depth. Powerful yet soft in appearance, the stone engages in a contrasting exchange with the crisp clarity of the metal.

AERRA HAZE follows a design approach that does not resolve duality, but deliberately embraces it: cold and warm, technical and organic, horizontal and vertical. The ensemble is assembled on site to form a cohesive architectural unit. The precise alignment of washbasin, mirror and faucet creates a calm, reduced wall presence and a clear visual order.

VALLONE

PRECISION BETWEEN MATERIALITY AND REFLECTION

With AERRA HAZE, VALLONE® has created a washbasin ensemble that integrates naturally into a wide range of interior contexts while maintaining a distinct and timeless character. Together with AERRA, it forms a series of sculptural washbasin ensembles that interpret materiality, reduction, and architectural clarity in different ways. Stainless steel and natural stone enter into a precisely balanced dialogue – calm in their presence, consistent in their design. The series is part of the VALLONE® ATELIER collection THE CORE OF NOW.

VALLONE® ATELIER understands space and object as a unified design expression. Its sculptural objects bring together materiality, function, and spatial impact. Contrasts are not resolved, but deliberately staged – precise, reduced, and defined by a distinct attitude. The result is design that not only complements spaces, but shapes them and creates atmosphere.

VALLONE® stands for exceptional design, uncompromising quality and a clear vision: creating spaces that are both functionally and aesthetically outstanding. With a portfolio defined by timeless elegance and contemporary architectural lines, VALLONE® has established itself as a style-defining interior brand on the international design stage.
