

debut: fabian freytag for vallone®

TIORE at the Milan Design Week

As part of Milan Design Week 2024, bathroom interior brand VALLONE® and Fabian Freytag Studio presented the result of their extraordinary and exclusive collaboration for the first time: TIORE – a washbasin that combines sculptural object character with maximum functionality. Consisting of a vanity unit, basin, tap, mirror and light, TIORE combines the elementary functions of a wash area in an expressionistic, compact and well-thought-out way down to the last detail.

ALCOVA MILANO: TIORE IN THE VILLA BORSANI

TIORE celebrated its premiere at the press tour Villa Borsani, a masterpiece of modern architecture and exceptional design. In two different versions, TIORE unfolded its strong design language in the basement of the villa. The duet of the two washbasins characterized the exciting setting with balanced proportions and extraordinary materials.

Sustainable and bio-based VELVET STONE® and marble, complementary colors and exciting shapes: TIORE harmonizes through contrasts and materiality. Rare, intensely colored marble varieties can be combined with selected color nuances to create individual designs. The geometric T-shape of the basin and vanity unit is broken up by the curved, vertical lines of the tap, mirror and lamp, giving TIORE a floral lightness that is also reflected in the name: Torre (tower) and Fiore (flower). The artificial combination of the two Italian words verbally underlines the elegant fusion of design and technical sophistication.

A COOPERATION WITH FOCUS ON DESIGN, QUALITY AND FUNCTIONALITY

The collaboration between VALLONE® and Fabian Freytag Studio marks an exciting synergy of product and interior design at the highest level. TIORE is the result of a shared understanding of quality, materiality and functionality between both parties. The washbasin presents itself as a sculptural masterpiece that can be individually configured. The maximum design standard that was set in the development of TIORE is complemented by the highest possible functionality. Every component has been explicitly used and conceived – this includes the storage space in the base cabinet, the side shelves in the basin and the mixer tap, the temperature of which is controlled at the front of the spout.

VALLONE® stands for exceptional design, uncompromising quality and a clear vision: to create spaces that are both functional and aesthetically outstanding. With a portfolio characterized by timeless elegance and modern lines, VALLONE® has established itself on the international design scene as a style-defining interior brand.
